The life of a designer is a life of fight. Fight against the ugliness. Just like a doctor fights against disease. For us, the visual pollution is what we have around, and what we do is cure it somehow with design.

Unfortunately, there are designers who intentionally look down on the consumer with the notion that vulgarity has a definite appeal to the masses, and therefore they supply the market with a continuous flow of crude and vulgar design. I consider this action criminal since it is producing visual pollution that is degrading our environment just like all other types of pollution.
